

Our mission is to advance research and provide a lifetime of support for individuals with autism and their families.

www.autismcenter.org

One of the only autism organizations in the world that provides a lifetime of services while conducting cutting edge research.

Established in 1997, the Southwest Autism Research & Resource Center (SARRC) is an internationally recognized, community-based nonprofit organization headquartered in Phoenix. SARRC is dedicated to autism research, high-quality intervention and education, training, and outreach.

Using evidence-based practices, SARRC's team of highly trained and educated clinicians provides services that not only impact the lives of individuals with autism, but also their parents, grandparents, siblings, physicians, psychologists, educators, and therapists.

To advance research, SARRC initiates and collaborates in large-scale studies to find answers to the most pressing questions faced by individuals with autism spectrum disorder (ASD) and their families. SARRC's innovative research is focused on improving screening and diagnosis for autism, improving treatments for autism including behavioral and pharmaceutical treatments, and educating professionals in order to increase their capacity to serve the autism community.
